

Tema 4 Computer Vision Cutic Eugen

Experimente

Efectuate cu parametrii default, cu exceptia celor mentionati.

- I. Cel mai bun rezultat (avg. precision) – Obținut pentru threshold = 2, dar rezulta in multe false positives/image:

- II. Threshold = 4 – avg. precision mai mic, mai putine false pozitives:

- III. Threshold = 2; Scaling_ratio = 0.7
